

# CTF Sites

## Welcome To The Biggest Collection Of CTF Sites

Made/Coded with ❤ by sh3llm4g1ck

**CTF Sites is now part of linuxpwndiary discord server, if you want to submit a site to CTF Sites project join [here](#)**

**You can submit a site using the `!submitctfsite [site] [description]` command. For more info check the `#how-to-submit` channel.**

### What Is CTF?

CTF (Capture The Flag) is a fun way to learn hacking. It's an information security competition, you have to solve challenges from decoding a string to hacking into a server. The goal is to find a specific piece of text called flag.

### What Is CTF Sites?

CTF Sites is the biggest collection of CTF sites, contains only permanent CTFs. I started this project more for myself in the beginning, like a cheat sheet but then I thought it would be good to make it publicly available, it would help a lot of people.

### How Can I Contribute & Support This Project?

If you know of a CTF site OR you own one and you want to add it here, join the linuxpwndiary  server [\[here\]](#)  
You can support me and this project by donating a small amount using the button below.
